Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	GPS , GSM	EDGE CAPABILITIES NETWORK SECURITY
FR-2	RASBERRY PI	ARDUINO DEVICE SECURITY

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	**Usability**	**It indicates how effectively and easy users can learn and use the system**
NFR-2	**Security**	**The system and its data protected against the malware attacks or unauthorized attack**
NFR-3	**Reliability**	**It specify how likely the system or its element would run without a failure for a given period of time under predefined conditions**
NFR-4	**Performance**	**It defines how fast does the system return the result in a certain workload**
NFR-5	**Availability**	**It describes how likely the system is accessible to the user at a given point of time**

NFR-6	**Scalability**	How much will this performance chance with high workloads
